

# eCOA Solutions

## User Stories & Acceptance Criteria

This document contains all user stories for the eCOA Solutions platform, organized by epic. Each story includes acceptance criteria for development and QA validation.

### Epic 1: Authentication & Authorization

#### US-101: Sponsor Login

|                     |                                                         |
|---------------------|---------------------------------------------------------|
| <b>As a</b>         | Sponsor Administrator                                   |
| <b>I want to</b>    | log in to the eCOA platform using my credentials        |
| <b>So that</b>      | I can access my studies and manage clinical trial forms |
| <b>Priority</b>     | <b>High</b>                                             |
| <b>Story Points</b> | 5                                                       |

#### Acceptance Criteria

- ✓ Given valid username and password, user is redirected to study dashboard
- ✓ Given invalid credentials, error message is displayed without revealing which field is incorrect
- ✓ Session timeout after 30 minutes of inactivity
- ✓ Password must meet complexity requirements (8+ chars, uppercase, lowercase, number, special char)
- ✓ Account locks after 5 failed login attempts

#### US-102: View Study List

|                     |                                                    |
|---------------------|----------------------------------------------------|
| <b>As a</b>         | Sponsor Administrator                              |
| <b>I want to</b>    | see a list of all my studies upon login            |
| <b>So that</b>      | I can quickly access and manage my clinical trials |
| <b>Priority</b>     | <b>High</b>                                        |
| <b>Story Points</b> | 3                                                  |

#### Acceptance Criteria

- ✓ Dashboard displays all studies associated with the sponsor account
- ✓ Each study shows: Study Name, Status (Draft/UAT/Production), Last Modified Date
- ✓ Studies are sortable by name, status, and date
- ✓ Search functionality to filter studies by name
- ✓ "Create New" button is prominently displayed

## Epic 2: Study Management

### US-201: Create New Study

|              |                                                             |
|--------------|-------------------------------------------------------------|
| As a         | Sponsor Administrator                                       |
| I want to    | create a new study by choosing between templates or scratch |
| So that      | I can start building my clinical trial forms efficiently    |
| Priority     | High                                                        |
| Story Points | 5                                                           |

#### Acceptance Criteria

- ✓ "Create New" button opens modal with two options: 'Use Templates' and 'Create from Scratch'
- ✓ Background blurs when modal is open
- ✓ Selecting 'Use Templates' navigates to template selection screen
- ✓ Selecting 'Create from Scratch' opens blank form builder canvas
- ✓ Study name is required before proceeding

### US-202: Clone Existing Study

|              |                                                            |
|--------------|------------------------------------------------------------|
| As a         | Sponsor Administrator                                      |
| I want to    | clone an existing deployed or draft study                  |
| So that      | I can reuse previous work and save time on similar studies |
| Priority     | High                                                       |
| Story Points | 5                                                          |

#### Acceptance Criteria

- ✓ Clone Study option available in template selection
- ✓ Search bar to find studies by name
- ✓ Results display: Questionnaire Name, Associated Study, Clone button
- ✓ Cloning creates a new draft copy with '(Copy)' suffix
- ✓ All forms, questions, and properties are duplicated
- ✓ Cloned study opens in form builder for editing

### US-203: Select Licensed Questionnaire

|              |                                                         |
|--------------|---------------------------------------------------------|
| As a         | Sponsor Administrator                                   |
| I want to    | select from a list of licensed/validated questionnaires |
| So that      | I can use industry-standard assessments in my study     |
| Priority     | Medium                                                  |
| Story Points | 5                                                       |

#### Acceptance Criteria

- ✓ Licensed Quest tab shows all available licensed questionnaires
- ✓ Each questionnaire displays: Name, Version, License Status
- ✓ Preview option to view questionnaire before selection
- ✓ Selected questionnaire is added to study as read-only template
- ✓ License agreement acknowledgment required before use

### US-204: Use Company Templates

|      |                       |
|------|-----------------------|
| As a | Sponsor Administrator |
|------|-----------------------|

|                                                               |                                                              |
|---------------------------------------------------------------|--------------------------------------------------------------|
| <b>I want to</b>                                              | select from pre-defined company-specific templates           |
| <b>So that</b>                                                | I can maintain consistency across our organization's studies |
| <b>Priority</b>                                               | <b>Medium</b>                                                |
| <b>Story Points</b>                                           | 3                                                            |
| <b>Acceptance Criteria</b>                                    |                                                              |
| ✓ Company Templates tab shows organization-specific templates |                                                              |
| ✓ Templates are categorized by type (e.g., Cipla Templates)   |                                                              |
| ✓ Template preview shows form structure and questions         |                                                              |
| ✓ Selected template creates editable copy in study            |                                                              |
| ✓ Admin can manage company template library                   |                                                              |

| <b>US-205: Save Custom Template</b>                   |                                                     |
|-------------------------------------------------------|-----------------------------------------------------|
| <b>As a</b>                                           | Sponsor Administrator                               |
| <b>I want to</b>                                      | save my form design as a reusable template          |
| <b>So that</b>                                        | I can reuse it in future studies without rebuilding |
| <b>Priority</b>                                       | <b>Low</b>                                          |
| <b>Story Points</b>                                   | 3                                                   |
| <b>Acceptance Criteria</b>                            |                                                     |
| ✓ "Save as Template" option available in form builder |                                                     |
| ✓ Template name and description are required          |                                                     |
| ✓ Template is saved to 'Our Templates' section        |                                                     |
| ✓ Templates can be marked as company-wide or personal |                                                     |
| ✓ Confirmation message displayed upon successful save |                                                     |

## Epic 3: Form Builder

### US-301: Drag and Drop Form Elements

|              |                                                         |
|--------------|---------------------------------------------------------|
| As a         | Sponsor Administrator                                   |
| I want to    | drag form elements from the tools panel onto the canvas |
| So that      | I can build custom questionnaires visually              |
| Priority     | High                                                    |
| Story Points | 8                                                       |

#### Acceptance Criteria

- ✓ Tools panel displays: Radio, Checkbox, Scale 1, Scale 2, Scale 3, Text
- ✓ Elements can be dragged onto blank canvas
- ✓ Visual indicator shows drop zone while dragging
- ✓ Dropped elements can be repositioned by dragging
- ✓ Elements can be deleted via delete button or keyboard shortcut
- ✓ Undo/Redo functionality for all canvas actions

### US-302: Configure Element Properties

|              |                                                          |
|--------------|----------------------------------------------------------|
| As a         | Sponsor Administrator                                    |
| I want to    | configure properties for each form element               |
| So that      | I can customize the appearance and behavior of questions |
| Priority     | High                                                     |
| Story Points | 5                                                        |

#### Acceptance Criteria

- ✓ Clicking element opens Properties panel
- ✓ Font selection with preview
- ✓ Size adjustment (Small, Medium, Large, Custom)
- ✓ Color picker for text and background
- ✓ Alignment options: Left, Center, Right
- ✓ Required/Optional toggle for each question
- ✓ Changes reflect immediately on canvas

### US-303: Add Logo to Form

|              |                                       |
|--------------|---------------------------------------|
| As a         | Sponsor Administrator                 |
| I want to    | add company or study logo to my forms |
| So that      | forms are branded and professional    |
| Priority     | Low                                   |
| Story Points | 3                                     |

#### Acceptance Criteria

- ✓ Logo upload option in form properties
- ✓ Supported formats: PNG, JPG, SVG
- ✓ Maximum file size: 2MB
- ✓ Logo position options: Top-left, Top-center, Top-right
- ✓ Logo appears on all form pages by default
- ✓ Option to show logo on first page only

**US-304: Multi-Page Form Navigation**

|                     |                                                            |
|---------------------|------------------------------------------------------------|
| <b>As a</b>         | Sponsor Administrator                                      |
| <b>I want to</b>    | create multi-page forms with navigation buttons            |
| <b>So that</b>      | complex questionnaires are broken into manageable sections |
| <b>Priority</b>     | <b>High</b>                                                |
| <b>Story Points</b> | 5                                                          |

**Acceptance Criteria**

- ✓ "Add Page" button creates new form page
- ✓ Next Page button automatically added to all pages except last
- ✓ Back button automatically added to all pages except first
- ✓ Page indicator shows current/total pages
- ✓ Pages can be reordered via drag and drop
- ✓ Page can be duplicated or deleted

**US-305: Mandatory Review Page**

|                     |                                                             |
|---------------------|-------------------------------------------------------------|
| <b>As a</b>         | Sponsor Administrator                                       |
| <b>I want to</b>    | have an automatic review page as the last page of all forms |
| <b>So that</b>      | patients can verify their answers before submission         |
| <b>Priority</b>     | <b>High</b>                                                 |
| <b>Story Points</b> | 5                                                           |

**Acceptance Criteria**

- ✓ Review page is automatically generated as final page
- ✓ Displays all questions with patient's answers
- ✓ Edit button next to each answer links back to that page
- ✓ Submit button only appears on review page
- ✓ Confirmation dialog before final submission
- ✓ Review page cannot be deleted or reordered

## Epic 4: Form Properties & Configuration

### US-401: Configure Completion Settings

|              |                                                      |
|--------------|------------------------------------------------------|
| As a         | Sponsor Administrator                                |
| I want to    | specify who should complete each form                |
| So that      | the right person receives and submits the assessment |
| Priority     | High                                                 |
| Story Points | 3                                                    |

#### Acceptance Criteria

- ✓ Completed By dropdown with options: Patient, Caregiver, Investigator
- ✓ Multiple selections allowed (e.g., Patient OR Caregiver)
- ✓ Selection affects form routing and notifications
- ✓ Default is Patient if not specified
- ✓ Setting is required before deployment

### US-402: Set Notification Schedule

|              |                                                     |
|--------------|-----------------------------------------------------|
| As a         | Sponsor Administrator                               |
| I want to    | configure notification frequency and timing         |
| So that      | patients receive timely reminders to complete forms |
| Priority     | High                                                |
| Story Points | 5                                                   |

#### Acceptance Criteria

- ✓ Notification frequency options: Once daily, Twice daily, Custom
- ✓ Time picker for specific notification times
- ✓ Multiple time slots can be configured
- ✓ Preview shows notification schedule
- ✓ Option to set quiet hours (no notifications)
- ✓ Timezone consideration based on patient location

### US-403: Configure Form Triggers

|              |                                                   |
|--------------|---------------------------------------------------|
| As a         | Sponsor Administrator                             |
| I want to    | set when forms should be triggered for completion |
| So that      | data collection aligns with study protocol        |
| Priority     | High                                              |
| Story Points | 5                                                 |

#### Acceptance Criteria

- ✓ Trigger options: Daily, Weekly, Monthly, Custom
- ✓ Weekly: Select specific days (Mon, Tue, etc.)
- ✓ Monthly: Select specific dates
- ✓ Custom: Define complex schedules
- ✓ Start and end dates for form availability
- ✓ Option to trigger based on events (e.g., after visit)

### US-404: Include in Reports Toggle

|      |                       |
|------|-----------------------|
| As a | Sponsor Administrator |
|------|-----------------------|

|                                                                                                                                                                                                                                                                            |                                                  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|
| <b>I want to</b>                                                                                                                                                                                                                                                           | choose whether form data is included in reports  |
| <b>So that</b>                                                                                                                                                                                                                                                             | I can control what data appears in study reports |
| <b>Priority</b>                                                                                                                                                                                                                                                            | <b>Medium</b>                                    |
| <b>Story Points</b>                                                                                                                                                                                                                                                        | 2                                                |
| <b>Acceptance Criteria</b>                                                                                                                                                                                                                                                 |                                                  |
| <ul style="list-style-type: none"><li>✓ Yes/No toggle for 'Include in Reports'</li><li>✓ Default is Yes</li><li>✓ Setting can be changed after deployment</li><li>✓ Forms excluded from reports still collect data</li><li>✓ Report preview shows included forms</li></ul> |                                                  |

## Epic 5: Deployment Workflow

### US-501: Deploy to UAT

|              |                                                 |
|--------------|-------------------------------------------------|
| As a         | Sponsor Administrator                           |
| I want to    | deploy my study to UAT environment for testing  |
| So that      | I can validate forms before going to production |
| Priority     | High                                            |
| Story Points | 5                                               |

#### Acceptance Criteria

- ✓ Deploy to UAT button available when study is complete
- ✓ Validation checks run before deployment (required fields, etc.)
- ✓ Deployment status indicator shows progress
- ✓ UAT environment accessible via separate URL
- ✓ Test data clearly marked as non-production
- ✓ Email notification sent upon successful deployment

### US-502: Manage Deployment Priority

|              |                                          |
|--------------|------------------------------------------|
| As a         | Sponsor Administrator                    |
| I want to    | set priority order for study deployments |
| So that      | critical studies are deployed first      |
| Priority     | Medium                                   |
| Story Points | 3                                        |

#### Acceptance Criteria

- ✓ Drag and drop interface to reorder studies in queue
- ✓ Priority 1 (highest) to Priority N ordering
- ✓ Visual indicator of current priority
- ✓ Changes take effect immediately
- ✓ Priority conflicts show warning message

### US-503: Submit Change Request

|              |                                             |
|--------------|---------------------------------------------|
| As a         | Sponsor Administrator                       |
| I want to    | submit change requests for deployed studies |
| So that      | I can update production studies when needed |
| Priority     | High                                        |
| Story Points | 5                                           |

#### Acceptance Criteria

- ✓ Change Request form with title and description
- ✓ Attach modified form/study to request
- ✓ Track change request status (Pending, Approved, Rejected)
- ✓ Version history maintained for all changes
- ✓ Approval workflow notification to admin
- ✓ Changes deployed after approval

### US-504: Promote to Production

|      |                       |
|------|-----------------------|
| As a | Sponsor Administrator |
|------|-----------------------|

|                                                                                                                                                                                                                                                                                                                                                                    |                                                  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|
| <b>I want to</b>                                                                                                                                                                                                                                                                                                                                                   | promote a validated study from UAT to Production |
| <b>So that</b>                                                                                                                                                                                                                                                                                                                                                     | patients can start completing forms              |
| <b>Priority</b>                                                                                                                                                                                                                                                                                                                                                    | <b>High</b>                                      |
| <b>Story Points</b>                                                                                                                                                                                                                                                                                                                                                | 5                                                |
| <b>Acceptance Criteria</b>                                                                                                                                                                                                                                                                                                                                         |                                                  |
| <ul style="list-style-type: none"><li>✓ Promote button enabled after UAT sign-off</li><li>✓ Final review checklist before promotion</li><li>✓ Production deployment confirmation dialog</li><li>✓ Rollback option available for 24 hours</li><li>✓ Production URL and access codes generated</li><li>✓ Stakeholder notification on successful deployment</li></ul> |                                                  |

## Epic 6: Patient Application

### US-601: Access Form via Unique Code

|              |                                                            |
|--------------|------------------------------------------------------------|
| As a         | Patient                                                    |
| I want to    | access my forms using my unique patient code               |
| So that      | my responses are linked to my clinical trial participation |
| Priority     | High                                                       |
| Story Points | 5                                                          |

#### Acceptance Criteria

- ✓ Patient enters unique code on login screen
- ✓ Code validates against study enrollment
- ✓ Invalid code shows appropriate error message
- ✓ Successful entry shows patient's pending forms
- ✓ Code can be entered via manual input or QR scan
- ✓ Remember device option for returning patients

### US-602: Complete Form on Mobile

|              |                                              |
|--------------|----------------------------------------------|
| As a         | Patient                                      |
| I want to    | complete forms on my mobile device           |
| So that      | I can participate in the study from anywhere |
| Priority     | High                                         |
| Story Points | 8                                            |

#### Acceptance Criteria

- ✓ Forms render responsively on mobile screens
- ✓ Touch-friendly input controls
- ✓ Progress is auto-saved after each question
- ✓ Offline mode saves responses locally
- ✓ Sync occurs when connection restored
- ✓ Form completion confirmation displayed

### US-603: Receive Push Notifications

|              |                                               |
|--------------|-----------------------------------------------|
| As a         | Patient                                       |
| I want to    | receive push notifications when forms are due |
| So that      | I don't miss scheduled assessments            |
| Priority     | High                                          |
| Story Points | 5                                             |

#### Acceptance Criteria

- ✓ Push notification sent at scheduled times
- ✓ Notification shows form name and due time
- ✓ Tapping notification opens the specific form
- ✓ Snooze option for 15/30/60 minutes
- ✓ Notification settings manageable in app
- ✓ Do Not Disturb hours respected

### US-604: Access Form via Browser

|                                                                                                                                                                                                                                                                                                                             |                                             |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>As a</b>                                                                                                                                                                                                                                                                                                                 | Patient                                     |
| <b>I want to</b>                                                                                                                                                                                                                                                                                                            | complete forms in a web browser             |
| <b>So that</b>                                                                                                                                                                                                                                                                                                              | I can participate without installing an app |
| <b>Priority</b>                                                                                                                                                                                                                                                                                                             | <b>Medium</b>                               |

| <b>Acceptance Criteria</b>                                                                                                                                                                                                                                                                                                  |                                             |
| <ul style="list-style-type: none"><li>✓ Web application accessible via standard browsers</li><li>✓ Responsive design works on desktop and mobile browsers</li><li>✓ Same functionality as native mobile app</li><li>✓ Progressive Web App (PWA) for offline support</li><li>✓ Bookmark/save to home screen option</li></ul> |                                             |

## Epic 7: Data Management & Reporting

### US-701: View Study Dashboard

|                     |                                                |
|---------------------|------------------------------------------------|
| <b>As a</b>         | Sponsor Administrator                          |
| <b>I want to</b>    | view a dashboard with study metrics and status |
| <b>So that</b>      | I can monitor study progress at a glance       |
| <b>Priority</b>     | Medium                                         |
| <b>Story Points</b> | 5                                              |

#### Acceptance Criteria

- ✓ Dashboard shows total enrolled patients
- ✓ Form completion rates displayed
- ✓ Overdue forms highlighted
- ✓ Charts for completion trends over time
- ✓ Filter by date range, site, form type
- ✓ Export dashboard as PDF

### US-702: Generate Standard Reports

|                     |                                               |
|---------------------|-----------------------------------------------|
| <b>As a</b>         | Sponsor Administrator                         |
| <b>I want to</b>    | generate standard reports from collected data |
| <b>So that</b>      | I can analyze and share study results         |
| <b>Priority</b>     | Medium                                        |
| <b>Story Points</b> | 5                                             |

#### Acceptance Criteria

- ✓ Report templates: Completion Summary, Patient Detail, Form Analysis
- ✓ Date range selection for report period
- ✓ Filter by site, patient group, form
- ✓ Export formats: PDF, Excel, CSV
- ✓ Schedule automated report generation
- ✓ Email reports to stakeholders

### US-703: Access Database with Keys

|                     |                                                      |
|---------------------|------------------------------------------------------|
| <b>As a</b>         | Data Manager                                         |
| <b>I want to</b>    | access the study database using provided access keys |
| <b>So that</b>      | I can integrate data with our analytics systems      |
| <b>Priority</b>     | High                                                 |
| <b>Story Points</b> | 5                                                    |

#### Acceptance Criteria

- ✓ Primary and secondary access keys provided
- ✓ API documentation for data access
- ✓ Read-only access by default
- ✓ Data validation rules documented
- ✓ Audit log for all data access
- ✓ Key rotation policy enforced

## Story Point Summary

| Epic                           | Stories   | Total Points |
|--------------------------------|-----------|--------------|
| Authentication & Authorization | 2         | 8            |
| Study Management               | 5         | 21           |
| Form Builder                   | 5         | 26           |
| Form Properties                | 4         | 15           |
| Deployment Workflow            | 4         | 18           |
| Patient Application            | 4         | 23           |
| Data & Reporting               | 3         | 15           |
| <b>TOTAL</b>                   | <b>27</b> | <b>126</b>   |
